

"SECRETOS DE ESPAÑOL"

Many of you have wondered how to get those diacritical marks (accent marks) over the vowels and the tilde over the ñ. Here is how it works in Microsoft products:

While holding down the **ALT key**, push these numbers in the number keypad to the right of the keyboard (it won't work if you use the numbers in a line above the alphabet)

á	=	0225	Á	=	0193
é	=	0233	É	=	144
í	=	0237	Í	=	0205
ó	=	0243	Ó	=	0211
ú	=	0250	Ú	=	0218
ü	=	0252	Ñ	=	165
ñ	=	0241	í	=	0161
			¿	=	0191

After you've typed these three or four numbers release the ALT key, and your letter with accent mark will appear. 😊
